- Power supply: ~ 230 V/50 Hz/120 VA
- Dimensions: 26 x 30 x 16 cm
- Weight: 5.6 kg

Lighting effects with several units.

Beat 06/2013

"The WASH-300LED is an excellent show spotlight with colourful LEDs of high luminous intensity. With the precise control, accurate moves can easily be realised. It provides a good stand-alone performance. However, with DMX and a suitable operating mode, it is also possible to integrate it into a complex lighting system. It is of very robust workmanship, compact design, low weight and provides a low-noise operation. This allows for highly flexible applications and ... furthermore, it is available at a very attractive price. An ideal entry into professional show lighting and definitely worth testing and buying."

SOUNDCHECK 07/2012

"The spotlight makes a good first impression due to a whisper-quiet operation. For this size and in this price class, the brightness is really excellent. It provides deep and impressive colours. No doubt a show spotlight, perfectly suitable for discotheques, as well as for musicians and stage applications."

- + Whisper-quiet operation
- + Extra high luminous intensity
